Profile

I am a passionate Software Engineer with experience in solving user and business problems, leveraging technology tools. I am always looking for ways to make the user experience better while meeting business goals.

Projects

Africonn - An African community

An African forum with jobs, polls, and blogging systems for the community

2020-05 – 2020-08

- I developed the project concepts and maintain optimal workflow.
- I deployed the site using AWS Cloud Infrastructures
- The project was built with Django python

An Investmest Site

For investment purposes.

I wrote the site's backend and business logics with python's flask, while jQuery, Tailwind CSS and HTML were enforced on the frontend. I deployed the solution on a Digital ocean droplet.
